

**Oostendorp Apparatenbouw is your partner for high-quality welding, piping and custom-built process equipment. With more than 900 certified welding procedures and a team of experienced specialists, we deliver quality you can rely on.**

## **Piping & Equipment Construction at the Highest Level**

### **Piping**

We handle the complete piping scope: prefabrication, on-site installation and welding in a wide range of materials such as P5/P11, Stainless Steel 321, Monel 400, C276/C22 and more. From small modifications to complex piping installations – we guarantee craftsmanship and reliable execution.

### **These are our projects**

We work for clients in the chemical, energy and pharmaceutical industries.

Our activities include repairs, expansions, prefab piping and on-site installation.

We are highly experienced in turnarounds and shutdowns, where flexibility, fast response and top-level quality are essential.

Thanks to our expertise in exotic materials, we also deliver complex special components with confidence.

With in-house engineering and a mix of large and small projects, we provide tailor-made solutions for every situation.
